Subject: Re: Sediment/Soil Recreational Screening Levels for the Animas

OK Kristen, thanks. Now I understand. The call I was on focused on table 1 because we were preparing to review the first water results.

Hi Dr. Burke,

Shaun asked me to send you the document containing the Recreational Screening Levels that Regions 6, 8, and 9 agreed upon during the Environmental Unit Call yesterday. Screening levels were developed for both surface water as well as exposure to soil/sediment for recreational receptors (hikers/backpackers/rafters). Please see table 2 in the attached document for the sediment/soil recreational screening levels.
